10 Day Look Ahead: Construction Activities

Friday April 7, 2017 through Sunday April 16, 2017

Special Notices:

First Street Lane/Sidewalk closure Saturday April 15 (between Mission and Howard Street) Overhead work is scheduled Saturday April 15 between 7:00AM and 4:30PM. This work will require closing the sidewalk of First Street due to materials handling and loading/unloading trucks from First Street.

Minna Street Full Closure Saturdays (between First and Second Streets): Underground Utility work will start early April. This work may occasionally include high vibration and loud activities. Work is scheduled at night, but also may require weekend work Saturday or Sunday day shift. Work will include excavation, loading/unloading trucks, materials handling and general construction as we connect the Transit Center piping to the City systems. Traffic control devices and construction flaggers will be assigned to assist with traffic and pedestrians.

Natoma Street Full Closure Saturdays (between Fremont and Second Streets): Underground Utility work will start mid-April. This work may occasionally include high vibration and loud activities. Work is scheduled at night, but also may require weekend work Saturday or Sunday day shift. Work will include excavation, loading/unloading trucks, materials handling and general construction as we connect the Transit Center piping to the City systems. Traffic control devices and construction flaggers will be assigned to assist with traffic and pedestrians.

Night Work (Between Beale and Second Streets): Transit Center general construction continues nightly onsite between 7:00 PM and 7:00 AM.

- First Street (between Mission and Howard Street) Rooftop Landscaping trees and material deliveries Saturday nights through April. This work will typically not include loud activities but trucking, materials handling and loading/unloading trucks from First Street will occur between the hours of 8:00PM through 4:30AM.
- Minna Street (between First and Second Streets): Underground Utility work will start early April. This work may occasionally include high vibration and loud activities. Work is scheduled Sunday through Thursday nights between 7:00 PM and 4:30 AM the next day.
